Age/DOB:	Email:
Demeanor:	

Imaging requested:	Price:	Check one:
Echocardiogram with interpretation	\$450	
Abdominal ultrasound with interpretation	\$450	
Ultrasound-guided FNA with w/ cytology (1-3 sites, Antech cytology interpretation included)	\$325	
Single organ system ultrasound (check one) Liver/gallbladder/pancreas Kidney/adrenals/bladder/prostate Gastrointestinal tract (stomach, small bowel, colon), spleen	\$325	
Reproductive ultrasounds are scheduled through Theriogenology (please call)		
Do you have any concerns with this patient having light sedation in addition to pre-medications (butorphanol, dexmedetomidine, afaxalone, etc)?	YES	NO

Please comment if you answered "YES":

Important reminders:

- Patient must be fasted for 8 hours.
- Please prescribe/dispense oral sedation (i.e., gabapentin, trazadone) and have the owner administer this medication at least 1-2 hours prior to the appointment.
 - Notify owners that their pet may need additional sedation to complete this procedure. (Additional light sedatives are included in the above price.)
 - If heavy sedation or general anesthesia is necessary to complete the imaging, the procedure may have to be rescheduled to accommodate patient needs.
- **Additional procedures (i.e., FNA's) will only be completed after the initial ultrasound is interpreted and must be scheduled at a later date.**
